Elden Ring Features Key:

THE NEW FANTASY ACTION RPG.
A Vast World Full of Excitement
Create your Own Character
An Epic Drama Born from a Myth

"The Lands Between are a land where man rules. A land full of excitement that's reflected in the battle system. A vast, exciting, and detailed fantasy world. Explore a vast world full of excitement! Engage in epic battles with a battle system that lets you advance in a strategic way. Choose from a variety of characters and customize your character freely. A mythic story that unfolds as fragments. A unique drama that develops naturally without relying on predetermined paths. A conflict that lies in wait between the People of the Night and the People of the Day." ====== ========== "LITTLEST NEWS, BIGGEST ANNOUNCEMENT, BEST PHAYY. THE NEW FANTASY ACTION RPG." ==========

This is an announcement to the Tarnished/Disbanded community.

Boss ZG has returned with a new job title & deadline for the game.

To those of you who have been waiting for us to release many of you may not know this, but Boss ZG is very busy writing for the D/Disbanded release. We also have a number of other projects in the works & are still considering if we will be releasing D/Disbanded, which would allow Boss ZG & the other members of Team R to concentrate on improving D/Disbanded. This of course would take much more time than Boss ZG said he could allot.

Boss ZG, along with the other Devs of Team R, have many ideas for Tarnished, and we want to take all the time needed to make the game we all want, but once we are sure to have it ready for the D/Disbanded release we are ready to harden the funding. We also want to focus on improving the D/Disbanded game first.

This announcement has 2 parts, Part 1 is the New Features of Tarnished and Part 2 is an Announcement on how to donate.

Part 1: Game Release Date. Tarnished will be releasing simultaneously with D/Disbanded. A specific date, is still TBD at this time.

One advantage of printed circuit board assemblies is that they are often able to provide a compact electronic component for use in a product. As a result, printed circuit board assemblies can provide a relatively compact electronic component which can occupy a reduced area in the product. A conventional printed circuit board assembly includes a PCB, a housing, and a conventional motherboard assembly. The printed circuit board assembly can include an integrated circuit (IC), a variety of passive components, e.g., capacitors and resistors, and a variety of connectors. The printed circuit board assembly can, in particular, be a multi-chip module (MCM) assembly. The IC of the printed circuit board assembly can be combined with a variety of other components, such as, for example, a plurality of passive components and a plurality of connectors in order to form the multi-chip module. The IC, which can include, for example, a microprocessor, can be mounted to the printed circuit board assembly using a process such as surface mounting or tape automated bonding (TAB). The printed circuit board assembly can be mounted to a motherboard, for example, by soldering the connectors of the printed circuit board assembly to corresponding connectors of the motherboard. Printed circuit board assemblies, however, can include various issues. One issue that can occur is when a PCB assembly includes
